Installing UiPath Studio Academic Alliance Edition

About the UiPath Studio Academic Alliance Edition 2021.10

UiPath Learning offers its partner organizations the opportunity to use the UiPath Studio, StudioX, Assistant and Robot at no charge through a dedicated Learning license, which is free to students and educators alike, for teaching, learning and research.

- The license entitles the user to access the *Automation Developer suite* (UiPath Studio, StudioX, Assistant and Robot) for testing and execution of the automations.
- The Academic Alliance Edition of UiPath Studio is a locked version of the software aligned to the current Studio course resources provided by the UiPath Academic Alliance Partners and UiPath Learning Partners. Moreover, the same courses offer a complete training for the current UiPath Certified Professional exams.
- The license key allows the activation of the UiPath Studio software on 2 different machines.
- The license type granted is Named User, and this will be applied solely to User Mode installs. Instructions for activating the Academic Alliance Edition license will be provided accordingly below.
- Each Academic Alliance Edition license expires after 365 days upon its activation, and it is subject to being extended as long as the Academic Alliance partnership is maintained.

We strongly recommend using the latest Academic Alliance Edition. All the curricula and hands-on lab materials will be aligned to this software version. This will avoid any disruptions to your learning experience. This will also ensure that projects can be shared between students and educators without software version differences.

If you have previous versions of the Academic Alliance Edition (20.10 or 19.10), please install the new one above it (i.e. no need to uninstall).

Download and Install UiPath Studio Academic Alliance Edition

1. To download your free copy of the UiPath Studio software, open the URL: https://www.uipath.com/landing/academic-studio-download. It is a private form designated only for the students and educators who are affiliated to the UiPath Academic Alliance & UiPath Learning Partner institutions.

2. Fill in your contact details and choose the institution you belong to. Should you not find your institution in the list, just select *I can't find my institution in the list*. and type it manually.

Your institution / organization name *

Australia - Flinders University

I declare that I have read and I agree with the License Agreement*

3. Click **Request Now**, then, check your email in a couple of minutes. You will receive a link to download the software by email.

Make sure you follow the steps in the email and carefully follow this guide.

**4.** Click on **Download UiPath Academic Alliance Edition Studio**

5. The file will begin downloading. Click to open the UiPathStudio.msi once it is downloaded. Click on the **Custom**, then accept the terms in the License Agreement and click on **Configure**.
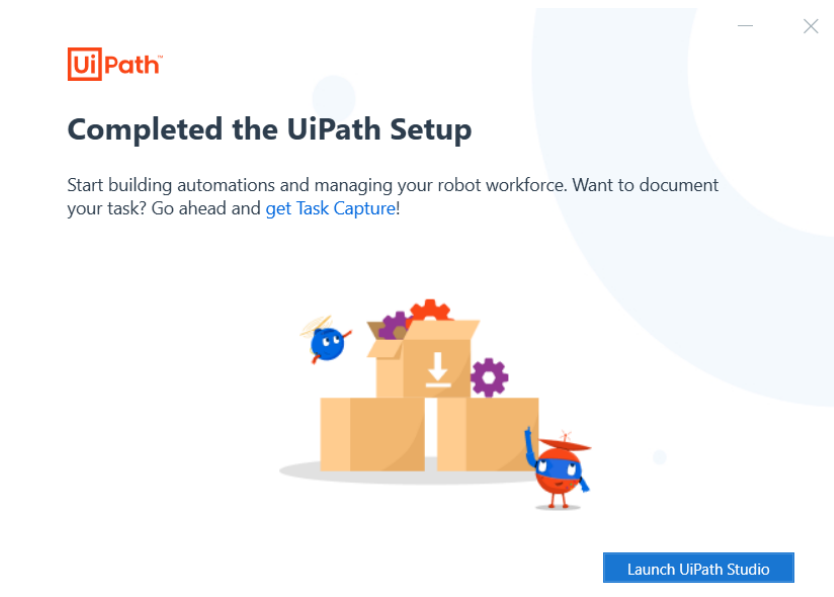

6. Select the **Automation Developer** package and click **Install**.

7. The software will begin its installation.
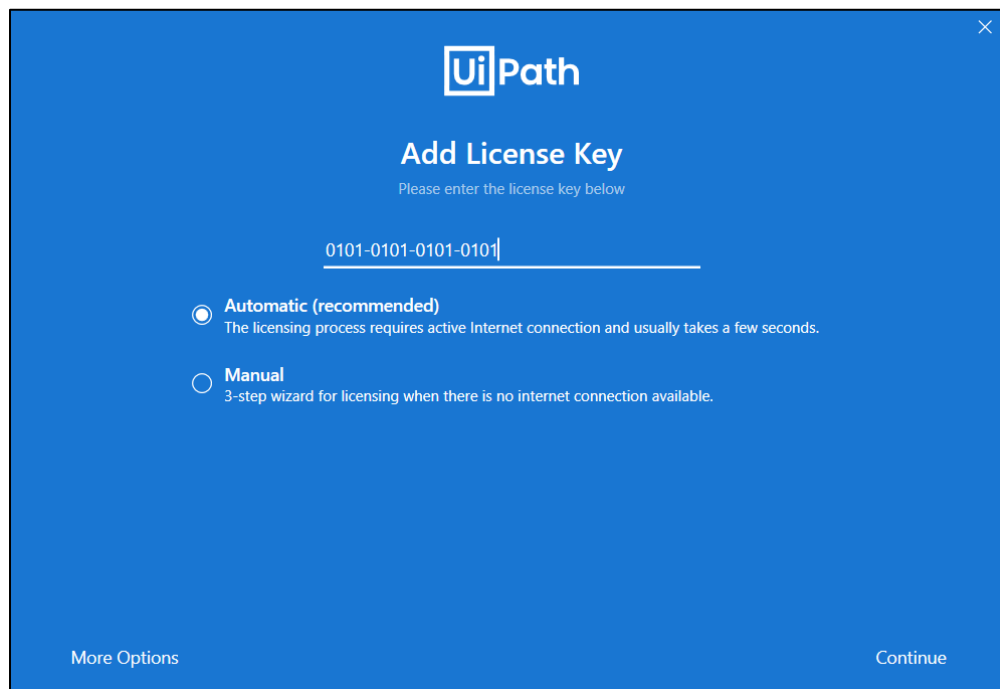

8. Click **Launch UiPath Studio**.

9. In the "Welcome to UiPath Studio" window, click on **More Options** and then **Standalone Options** to activate your dedicated Academic Alliance Edition of Studio with your license key.
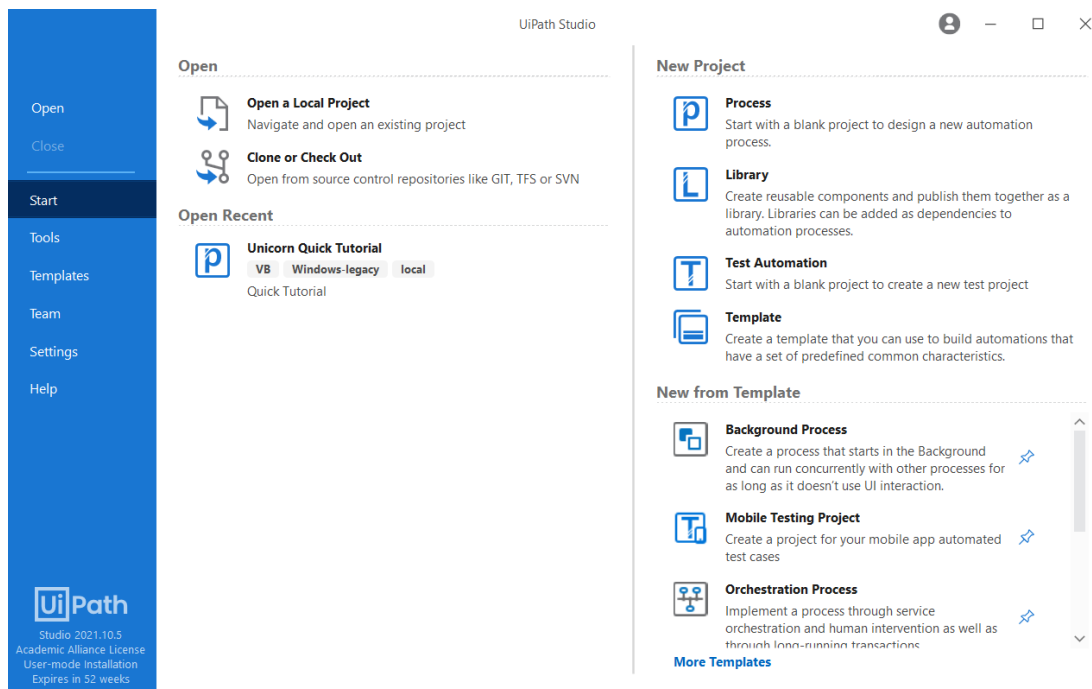

10. The UiPath Registration window is displayed.
    a. Enter the **License Key** you received by email, including the dashes.
    b. Select **Automatic** activation, but ensure you have internet connection.
    c. Click **Continue**. Your UiPath license is now activated.

11. Now, you can start using UiPath Studio and StudioX software to create automation workflows.

12. In order to switch between the two profiles (Studio or StudioX) you should just go to Settings – License and Profile – View or Change Profile. Choose whether you want to use UiPath Studio or StudioX.

13.
